

# COMPLIANCE STATEMENT

## Per- and Polyfluoroalkyl Substances (PFAS)

This sheet is to confirm that the product(s)/part number(s) referenced below **do not** contain any of the PFAS compounds\*, except any that are marked as “Contain” in the PFAS Compliance Status specifically:

\* PFAS compounds are defined as fluorinated substances that contain at least one **fully fluorinated methyl or methylene carbon atom (without any H/Cl/Br/I atom attached to it)**, i.e., with a few noted exceptions, any chemical with at least a perfluorinated methyl group (-CF<sub>3</sub>) or a perfluorinated methylene group (-CF<sub>2</sub>-) is a PFAS. The “noted exceptions” refer to a carbon atom with a H/Cl/Br/I atom attached to it.

Several commonly used PFAS compounds are listed below, and more can be found in four reference lists of known PFAS compounds are provided for reference below; however, the request incorporates all PFAS compounds regardless of their presence on the provided reference lists.

<sup>2</sup> Intentionally added means a chemical which has been deliberately added to the part or model where that substance or its intentional breakdown products is intended to have a functional or technical effect in the final product. If a product contains a technically unavoidable quantity of that substance, that trace quantity shall not be considered intentionally added.
